

	<b>At presentation</b>	<b>At last follow-up</b>	<b>Gain/deformity correction</b>
<b>Mean arc of motion</b>	46 degrees (in all patients)	98 degrees	52 degrees (in all patients)
<b>Mean flexion</b>	71 degrees (in all patients)	100 degrees (in all patients)	35 degrees (in 12 patients with flexion less than 90 degrees at presentation)
<b>Mean flexion contracture</b>	30 degrees (in 12 patients with flexion contractures at presentation)	8 degrees (in 4 patients with residual flexion contracture)	28 degrees (in 12 patients with flexion contractures at presentation)

Table 3 (Overall range of motion outcomes).
