Table 2: Type of uveitis in patients with a family history of inflammatory disease as compared to control subjects

	With Inflammatory Bowel Disease family history (Test)	Without Inflammatory Bowel Disease family history (Control)	P value§
Acute Anterior Uveitis	n=4 (27 %)	n= 1 (6 %)	P= 0.16
Chronic Iridocyclitis	n= 3 (20%)	n= 7 (47%)	P = 0.12
Intermediate Uveitis	n= 6 (40%)	n= 2(13%)	P= 0.11
Scleritis/Sclerokeratitis	n= 2 (13%)	n= 4 (27)	P= 0.32
Posterior Uveitis	n=0	n=1 (6%)	P= 0.50

§ two sided P value calculated using Fisher exact test
