Regional intermediaries and subrecipients

The final median response rate in Illinois is [72.6%](#) (the mean is [71.4%](#)), based on data from [October 28, 2020](#). Illinois has the [seventh-highest](#) overall response rate in the country. For the MTC graphs and maps, we use the median response rate across census tracts, rather than the mean, because the median reduces the effect of outliers that may distort the mean up or down.
